Savi™ Go

For Microsoft® Office Communicator 2007

UNIFY PC AND MOBILE COMMUNICATIONS

Designed for in-office mobile professionals, the Plantronics Savi Go headset with multipoint technology lets you seamlessly switch between calls received on your PC via Microsoft® Office Communicator Server (OCS) and those received on your mobile phone. Incorporating wideband audio that sharpens PC voice transmissions and streaming audio, the Bluetooth® enabled Savi Go headset features a noise-cancelling microphone and ergonomically designed wearing options that maximise your comfort and productivity throughout the day.

Convertible headset shown with ear loop

WIRELESS BENEFITS

Seamless communication. Multipoint technology allows you to manage calls from both your PC and your mobile phone using a single headset – in your own workspace, in nearby offices or conference rooms – every way and everywhere you need to connect.

Robust audio. Wideband PC audio delivers rich, life-like fidelity, while extended boom and noise-cancelling microphone heighten speech clarity.

Simple call control. A single button lets you control call answer/end, volume and mute, and call alert notifies you of incoming calls while you're listening to streaming audio.

Wireless mobility. Class 1 Bluetooth range accommodates your mobile work style up to 64 metres from your PC.

Convertible wearing style. Choose from easy-fit earloops or adjustable headband, and enjoy all-day comfort with either wearing style.

Optimised for multimedia. Wideband audio enriches PC communications, music, and other media applications.
